

1

LEVEL 1

Atomic

pitch perception

A Single-note identification**A1** Single pitch**A2** Loudness variation**A3** Duration variation**B Temporal localization****B1** Pitch within silence**B2** Pitch at a timestamp**B3** Timing of a single tone**B4** Timing of a named pitch**B5** Timing of every note**C Chordal structure****C1** Count simultaneous pitches**C2** Identify a dyad interval**C3** Identify chord quality**C4** Name all pitches in a chord

2

LEVEL 2

Contextual

pitch perception

D Sequential structure**D1** Count pitches in sequence**D2** Higher / lower judgement**D3** Discrete melodic contour**D4** Continuous pitch trajectory**D5** Rank pitches by height**D6** Signed interval between notes**D7** Pitch with a reference tone**D8** All pitches in sequence**E Acoustic variations****E1** Audio effects**E2** Background interference**E3** Harmonic saturation**E4** Time stretching / resampling**E5** Vibrato**E6** Slight detuning

3

LEVEL 3

Melodic

pitch perception

F Melody in polyphony**F1** Voice in synthetic mixtures**F2** Voice in Bach chorales
